9. ☐ Other _____

The following is an examiner's statement of reasons for allowance:

The claims are deemed free of the art, given the failure of the prior art to teach or reasonably suggest transformed poinsettia. Applicant's arguments of 03 April 2006 re US 5,945,579 to Smith are now deemed persuasive. During the prosecution of the instant application, the Examiner has established that poinsettia was recalcitrant to tissue culture and transformation, particularly Agrobacterium-mediated transformation, prior to Applicant's invention. Applicant provided a detailed protocol for poinsettia tissue culture utilizing particular plant tissues and culture media; and utilizing non-Agrobacterium transformation, namely biolistic transformation. Smith only exemplified Agrobacterium-mediated transformation of tobacco (see column 9, line 8 through column 11, line 17 of US 5,945,579). Smith did not disclose any of the tissue culture or transformation techniques specifically disclosed by Applicant to be essential to overcome the past recalcitrance of poinsettia.

It is noted that claim 11 of Smith recites six other embodiments, namely transformed petunia, chrysanthemum, carnation, begonia, tradescantia, and snapdragon. In fact, it is well-known in the art that petunia is closely related to tobacco exemplified by Smith, and that methods for tissue culture and Agrobacterium-mediated transformation of petunia were well-known in the art at least by the mid- 1980s.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
